

Robert Herrera

Fullstack Developer

Venezuela | Open to remote opportunities

rahp.dev@gmail.com | [GitHub / rahp-dev](#) | [LinkedIn](#)

Professional Summary

Fullstack Developer with 4+ years of experience building production web applications. Strong React background, with backend ownership using NestJS, PostgreSQL and Prisma. Experience delivering CRM/ERP features, accounting workflows and Mercado Pago payment links, plus support for the Fliinow API integration.

Professional Experience

Arcadia Viajes | Fullstack Developer

Sep 2024 – Present | Remote

- Led frontend development for a travel CRM/ERP using React, TailwindCSS, Redux and RTK Query, supporting travel operations, suppliers and client workflows.
- Expanded into fullstack development in 2025, owning NestJS backend modules with PostgreSQL and Prisma and optimizing existing modules and queries.
- Built an accounting module for tracking and reporting fixed operating expenses, replacing manual spreadsheet workflows.
- Integrated the Mercado Pago API to generate payment links directly from the system and provided support for the Fliinow API integration.

PosGlobal | IT Intern to Junior Developer

Jan 2022 – Sep 2024 | Venezuela

- Maintained and extended a corporate intranet built with Laravel and Vue.js.
- Independently delivered a raffle management application for Sumni VZLA using React and TailwindCSS, from requirements through deployment.

Technical Skills

Frontend: React, TailwindCSS, Redux Toolkit, RTK Query, Axios; working knowledge of Vue.js and Angular.

Backend and databases: NestJS, Prisma, REST APIs, PostgreSQL, MySQL; prior experience with Laravel.

Tools: Git, GitHub, Vite, npm/yarn, ESLint.

Education and Development

Self-directed learning through production work and online courses in React, NestJS and system design. Currently exploring Docker, CI/CD, n8n and automated testing.

Languages

Spanish: Native | English: Professional working proficiency for technical documentation and asynchronous communication.
